PROJECTS

Billing Management

Developed a comprehensive Billing Management System using a Java framework with an SQL database backend. The project aimed to streamline and automate the billing processes for enhanced efficiency and accuracy.

Technologies Used:

• Java framework (Specify the framework, e.g., Spring, Hibernate).

• SQL for database design and management.

Weather Application

- Developed a dynamic Weather Application using HTML, CSS, and JavaScript, incorporating a third party API for real-time weather data.

To-Do-List

- Developed a To-do-list using HTML,CSS and JavaScript .In this To Do list we can add our task list and mark that task as completed or incomplete.
- In this Project Local Storage is used store the To Do list in your web browser
